CAREER OBJECTIVE

Software Engineering student passionate about technology and software development. Currently in the second semester of my degree, I am seeking an opportunity to begin my career in the field, apply my technical knowledge, gain hands-on experience, and contribute to the development of innovative solutions. I am committed to continuous learning, professional growth, and teamwork, and I am always looking for new challenges and opportunities to develop.

LANGUAGES

- Portuguese – Native
- English – Intermediate to Advanced
- Spanish – Basic

SKILLS

- Programming languages and technologies: Python, JavaScript, HTML, CSS, Java, and Spring Boot
- Familiarity with VS Code and IntelliJ IDEA
- Programming logic and algorithms
- Microsoft Office Suite
- Teamwork
- Software development
- Communication
- Ability to learn new technologies quickly
- Proactiveness

PROJECT EXPERIENCE

Python Game Development – PyPong
May 2026 – June 2026

PyPong is a Python game development project that has been instrumental in strengthening my programming skills. While building it, I have applied concepts studied in class, including programming logic, data structures, functions, object-oriented programming, and problem-solving. The project allows me to turn theory into practical development experience and deepen my understanding of the software creation process.

Movie Catalog Website – CineVerse

February 2026 – May 2026

CineVerse is an academic project developed at PUC Minas to create a movie catalog platform using HTML, CSS, and JavaScript. The project includes third-party service integrations and a database, expanding my understanding of how web applications work. It has also helped me develop skills in front-end development, data organization, and building interactive user interfaces.

EDUCATION

Pontifical Catholic University of Minas Gerais (PUC Minas) – Bachelor's Degree in Software Engineering

February 2026 – December 2029

Enrolling at the Pontifical Catholic University of Minas Gerais was an important milestone in my academic and personal journey. My university experience has broadened my perspective on technology, software development, and teamwork while strengthening my commitment to continuous learning. Throughout this journey, I have been developing not only technical knowledge but also communication, organizational, and problem-solving skills.

Colégio Santo Agostinho – High School Diploma

January 2013 – December 2025

My time at Colégio Santo Agostinho in Belo Horizonte played an important role in shaping who I am today. I had the opportunity to participate in sports teams, which strengthened my ability to work with others, face challenges, and develop discipline and commitment toward shared goals. It was also where I first studied other languages, including English and Spanish.

Beyond academics, the school played an important role in shaping the values I carry with me, such as respect, responsibility, integrity, and solidarity. The educational environment and experiences I had contributed significantly to my personal growth and helped prepare me for academic and professional challenges.

I am grateful for the experiences, friendships, lessons, and opportunities from this period, all of which helped shape my outlook and character.

COURSES AND CERTIFICATES

Better Mind – English Language Course

2019 – 2024

During my years at Better Mind, I built the foundation of my English proficiency. The course helped me improve my listening, reading, writing, and communication skills, supporting both my academic and professional development. It also strengthened my confidence in learning from international sources and preparing for opportunities in an increasingly globalized market.

Python – Santander
July 2026 – August 2026

This course gave me the opportunity to put into practice the concepts and skills I learned during the first semester of my Software Engineering degree at PUC Minas. It was a valuable way to reinforce my understanding and apply what I have been studying.
